single gpx_devra : 处理单条 GPX

work_out_gpx_: parse previous no hr data

export _ xml_parser: parse export.xml

TODO:

work_out_gpx

export, xml's hr

singlegpx_ ←

after merging hr, output

New changes:

merge: one file

main: use other files to do:
      parse, get hr, output

better no funcs in main

what we need to merge: file name, content in the file
                                    (single_gpx type)

the class: func: getting single gpx data,

          Init: file name, device_name

main   gpx
